DANIEL HERNÁNDEZ

SOFTWARE DEVELOPER

ABOUT ME

Hello, I'm Daniel Hernández, generally I'm constantly learning things, my route as a programmer is focused more on the Backend, since I'm not good at design and I haven't been interested in it, in itself I like the logic part of a program more.

EXPERIENCE

2024 Library

I made an API for the processing of book loans from a library, the API managed the processing of books, users with a loan, who made the loan, etc. The API was consumed in a website with a normal design only for the processing of the API.

STUDIES

2023 - Present

Software and Mobile Application Development

CBN - Corporación Bolivariana del Norte
